

# Verdict from Hitachi

## Bringing interaction and variety to lessons

VerdICT is an interactive voting system that makes every lesson and lecture interactive, enabling you to create a fun and dynamic learning environment.

### VerdICT is an easy to use, yet versatile tool

- performance rating
- displaying multiple-choice questions
- end of lesson or course reviews
- class surveys
- voting quizzes
- tests

Your students respond using infra-red handsets. VerdICT instantly marks and analyses answers - freeing you from marking papers and compiling statistics.

### Puts you in control

VerdICT puts you in control, so you can choose to make answers anonymous, or to enable students to instantly see how well they're doing in relation to others - and to find out if they understand the subject as well as they think they do! Because you are in control, you'll be able to change your content and you can get a good idea of how well you're putting your ideas across.

### Easy to use software

VerdICT is part of - and works with - Hitachi's interactive product range, and it comes with easy to use software which provides over 1500 multiple choice questions, exercises and exam papers.

You can operate VerdICT from any point in the classroom - so there's no need to move back to the computer. You can pause it at any time during the session to show live video footage, visit a relevant web page or view additional lesson content.

However you choose to use it, VerdICT delivers the ultimate in interactive learning.

# Verdict from Hitachi

## Bringing interaction and variety to lessons

### The new dimension in learning

#### How does Verdict work?

- You type in multiple-choice questions, using simple, intuitive software. You can add sounds, pictures and even video.
- It displays the questions on a projector screen or TV.
- Students choose their answers on a handset.
- An infra-red receiver picks up responses and stores them on your PC.
- Verdict grades and analyses the answers.
- You can instantly see the results on screen - or you can print reports, statistics or graphs.
- Verdict offers five question-and-answer formats.

#### Verdict benefits:

- Makes IT an exciting part of your teaching.
- Provides a more active learning environment.
- Gives you customised tests and voting.
- Students can check they understand things as well as they think they do.
- Lets you assess learning in real-time.
- Offers immediate feedback.
- Frees you from marking papers.
- Engages the class with colourful material.
- Offers customised content.
- Gives you statistics that reduce your workload.
